

This map displays the geographical layout of Storey County, Nevada, and its immediate surroundings. The county's jurisdiction is clearly marked by a red outline. To the northwest, the city of Sparks is visible, followed by the larger urban area of Reno. To the east, the map shows the towns of Wadsworth and Fernley. To the south, Silver City and Dayton are indicated. The map is rich with detail, showing a network of roads, including major highways like I-580 and US-93, as well as local streets. Natural features such as the Truckee River, various lakes, and mountainous terrain are also depicted. A specific region within the county is highlighted in yellow and labeled with the number '9702', likely representing a census tract or a specific land management area. The map also includes labels for various smaller communities and geographical features, providing a comprehensive overview of the area.

CENSUS TRACT CODE REVIEW MAP - LEGEND

SYMBOL/DESCRIPTION	SYMBOL	LABEL/STYLE	DESCRIPTION	SYMBOL	DESCRIPTION	SYMBOL
American Indian Reservation and/or OH-Reservation Trust Land		not labeled	Water Body		Interstate or U.S. Highway	
State (or statistically equivalent entity)		NEW YORK 36	College or University		State Highway/Road	
County (or statistically equivalent entity)		ERIE 029	Military		Other Road	
Minor Civil Division (MCD) ¹		Lee town	Prison or Juvenile Detention Center		4WD Trail, Stairway, Alley, Walkway, or Ferry	
Consolidated City		MILFORD	National Park or Forest		Nevadable Boundary	
Incorporated Place ²		Davis	Outside Subject Area			
Census Designated Place (CDP)		Cochiti	Inset Area			
Census Tract ³		33.07				

Where state and county, and/or MCD boundaries coincide, the map shows the boundary symbol for only the highest-ranking of these boundaries.

State and county names are followed by their FIPS code.

- MCDs are symbolized and labeled only in the 12 strong MCD states: Connecticut, Maine, Massachusetts, Michigan, Minnesota, New Hampshire, New Jersey, New York, Pennsylvania, Rhode Island, Vermont, and Wisconsin.
- Incorporated place name color corresponds to the incorporated place fill color.
- The full census tract code consists of six digits with an implied decimal point between the fourth and fifth digits. For legibility on this map, the leading zeros have been stripped and the decimal point is shown. To translate a census tract number on the map to its full code, add as many zeros as needed to the left side of the number to reach six total digits and remove the decimal point before the last two digits.
Example: Census tract number on the map "33.07" represents census tract code "003307"

Due to space limitations, some road names, along with other feature and geography names on the map, may not be shown.

The plotted map scale is 1:47,268

Statistical boundaries reflect planned 2020 geographies as collected through the 2020 Participant Statistical Areas Program. All legal boundaries and names are as of January 1, 2019. The boundaries shown on this map are for Census Bureau statistical data collection and tabulation purposes only; their depiction and designation for statistical purposes does not constitute a determination of jurisdictional authority or rights of ownership or entitlement.
